The Solution for Trade War

We keep the value like before

STEMOD

The Situation

LED manufacturers' export business to North America and other emerging markets has been considerably influenced by the trade war and currency depreciation. With the next wave of tariffs going into effect on September 24, tariffs of 10 percent will be imposed on Chinese products, with more than 30 categories of LED lighting-related products included. Accounting for around 70% of China's LED lighting exports, the $8 billion worth of products will face even higher tariffs of 25% by January 1st, 2019.

Table: LED Products in Proposed Tariff List Under Section 301 Action

HTSUS Subheading	Product Description	HTSUS Subheading	Product Description
8539.10	Sealed beam lamp units	9405.40	Electric lamps and lighting fixtures nesoi
8539.21	Tungsten halogen electrical filament lamps	9405.50	Non-electrical lamps and lighting fixtures nesoi
8539.31	Fluorescent, hot cathode discharge lamps	9405.60	Illuminated signs, illuminated name plates and the like

STEMOD

The Solution

STEMOD in Taiwan
1. Production Line for Project-Based
2. QC for Final Product
3. SCM
4. Key Component Development

STEMOD in China
1. Production Line
2. SCM
3. QC for SKD
4. QC for Final Product
5. Tooling Development
6. Engineering

Global Production : Taiwan ; China ; South Africa

Flexible Production : SCM for Customer Demand

Key components Inventory : >50000pcs Led Driver Stock

STEMOD in South Africa
1. Production Line for Consumer-Based
2. SCM
3. QC for Final Product
